

Food Grade Essential Oils

We carry an excellent line of food grade 100% pure essential oils, all available in 1/3 fluid ounce (unless otherwise noted) amber bottles with a fitted dropper insert in place. They have tamper-evident, child-proof lids. It is important to remember that pure essential oils need to be properly diluted before use and that some may irritate the skin. They must be kept out of the reach of children. As with any alternative product, if pregnant, suffering from any medical condition, or taking medication, consult a health care practitioner before use. Avoid putting oils in direct sunlight and store away from heat and light. If properly stored, they maintain their potency for many years. Remember that they are volatile and concentrated. Even though these are food grade, they are sold as flavorings and may be toxic if taken internally in excessive amounts. When using these oils for aromatherapy, remember to use mostly water in the aromalamp and add only a couple of drops of the essential oil. Please note that essential oil prices constantly fluctuate depending on the market availability. If the current price is over \$1 more than is listed, you will be contacted to confirm the new price before processing your purchase.

SAFETY DATA LEGEND			
Use with Caution when one of the following applies:			
E	Epileptic	SI	Skin Irritant (dilute well before using)
HBP	High Blood Pressure	SI*	EXTREME Skin Irritant
S	Sun Exposure	P	Pregnancy

Name	Latin Name	Country of Origin	Safety Data	Price
